HP Color LaserJet Pro M280 Printers - Wireless Printer Setup (Mac) This document is for computers with Windows and HP Color LaserJet Pro M280nw, M281cdw, M281fdn, and M281fdw printers.. The problem of wireless was at first that it disconnects every while from wifi and the wireless card disappears or some times still there but don't connect to the wifi again.. I sent him to HP again as it's still coved by the warranty and after a long time of waiting they told me that the Wlan is good and the problem is with the driver and said nothing else! I have searched online for a solution for this and one friend who has the same laptop (and ironically had the same two problems with the screen and wifi) and he gave me another Wlan driver that worked with him and also with me.. I tried to go to the HP support site to get the appropriate wlan driver but to my surprise i found about 18 different driver! Of course i didn't know which one to choose! I tried to now the exact wlan card in this damn laptop from its data sheet and found this: WLAN: Realtek 802. 773a7aa168 [How To Use Irig Midi With Garageband Ipad](#)
